

Evacuation

If it becomes necessary to evacuate the area, notice will be given by EAS radio and by public address announcements from Coast Guard and Marine Police in boats and aircraft. Information will include where to go and how to get there.

What to do before you leave...

If you have to leave your boat:

- Secure the boat in a slip or at a dock, if possible.
- If no slip or dockage is available, securely anchor your vessel.
- Close and lock your boat.
- Collect special medicines, food, clothing, eyeglasses, etc., to take with you.
- Follow the evacuation routes out of the area. Share rides if possible with others. Buses will be available for people without cars.

EMERGENCY INFORMATION FOR BOATERS

On the Water
within a 10-Mile
Radius of the
Salem/Hope Creek
Nuclear Power Plant
at Lower Alloways
Creek NJ, or the
Oyster Creek
Nuclear Power Plant
at Lacey Township NJ

(08/2010)

REMEMBER:
**There will be time to protect
yourself and your family.**

In the Event of a Nuclear Power Plant Emergency...

How will you learn if there's been a nuclear accident?

If there is an accident at either the Salem/Hope Creek or the Oyster Creek Nuclear Power Plants, the New Jersey State Police and the United States Coast Guard will alert the boaters in the affected areas.

Boaters who are on the creeks within a 10-mile radius of the affected power plant will be alerted by a land-based siren system. **The sirens will sound a steady three to five minute blast which varies in loudness as the siren rotates.** (Not a wailing or warbling signal.)

What should you do?

Return to the marina that you left from, unless you are instructed otherwise. Follow Coast Guard and Marine Police instructions.

Turn on your radio to a local Emergency Alert System station and listen for instructions.

Sheltering *(remain indoors)*

Sheltering is one protective action that might be ordered in a nuclear plant emergency. Notice will be given on the radio. **IF YOU ARE TOLD TO TAKE SHELTER, GO ASHORE AND FIND SHELTER IN THE BEST AVAILABLE BUILDING** such as a nearby marina office, restaurant, business, or home. A boat's cabin or automobile is **not** the recommended shelter for your personal protection. If your boat has a cabin, you or your passengers should take shelter there until you reach shore. Do the following:

- Close outside doors, hatches, and windows. This helps keep out radioactive materials that may be outside.
- Shut air intakes and turn off fans and air conditioners.
- Cover food and put uncovered food in the refrigerator or cooler. It is safe to eat or drink anything in sealed containers. Water kept in a container is safe to drink as long as the container has been kept closed.
- If you must go outside, cover your nose and mouth with a cloth or towel. This filters out radioactive material in the air. When returning indoors, leave outer clothing outside. If possible, wash any part of your body not covered by clothes with soap and water.
- Keep your radio turned on and listen for further instructions.
- Do not use the telephone leave lines open for emergency use.
- Any other actions you should take will be broadcast by State or County officials when needed. Stay tuned to your local Emergency Alert Station. Stay indoors until you receive official notice that it's safe to go out.
